Summary: Fiscal Year Enrollment

Fiscal year enrollment considers activity in consecutive summer, fall, and spring terms. For example, FY23 represents summer 2022, fall 2022 and spring 2023 semesters. A student is counted if they enrolled in one or more semesters during the fiscal year.

The number of distinct students taking at least one for-credit or non-credit course decreased 22.5 percent (39,383 to 30,529) between FY19-FY23 and 1.8 percent (31,102 to 30,529) from FY22-FY23 (Table 1.24a). The total number of students taking at least one for-credit course in FY23 was 29,658, a 1.8 percent decrease from 30,213 in FY22. Of these, 57.6 percent (17,084 students) registered at UAA, 37.3 percent (11,067 students) at UAF, and the remaining 11.6 percent (3,453 students) at UAS (Table 1.24b). The total number of students taking at least one non-credit course decreased by 37.7 percent from FY19-FY23 (1,995 to 1,242 students). The trend reversed FY22-FY23 with the total number of students taking at least one non-credit course increasing by 8.3 percent from 1,147 to 1,242 students (Table 1.24c).

Total student credit hours attempted decreased 2.9 percent from 363,548 in FY22 to 353,100 in FY23 (Table 1.25).

Total student full-time equivalents (FTE) decreased by 27.8 percent from FY19-FY23 (16,721 to 12,075) and decreased by 2.9 percent from FY22-FY23 (12,440 to 12,075) (Table 1.26).

Dual enrollment refers to enrollment at the university by a student who is simultaneously enrolled in a K-12 (or homeschool) for which the student may receive credit at both the K-12 and postsecondary levels.

In FY23, 3,597 K-12 students were dual enrolled, a 11.8 percent increase from FY22 (3,218 students) and a 13.3 percent increase from FY19 (3,174 students). Dual enrolled students taking a class from UAA increased 17.7 percent, from 1,358 in FY22 to 1,598 in FY23. UAF dual enrollment students increased 10.6 percent from 1,438 students in FY22 to 1,589 students in FY23. UAS dual enrollment headcount remained relatively unchanged over the last year (Table 1.13c).

Dual enrolled students attempted a total of 28,826 student credit hours (SCH)in FY23, accounting for 8 percent of all SCH that year. The number of SCH attempted by dual enrolled students grew 15 percent (3,798 SCH) from FY19 to FY23 and 9.6 percent (2,516 SCH) between FY22 and FY23.

UAA dual enrollment SCH increased from 15,047 in FY22 to 17,033 in FY23, growth of 13.2 percent. UAF delivered 8,873 SCH to dual enrolled students in FY23, up 5.9 percent over the FY22 level of 8,381 SCH. During the same period, UAS dual enrollment SCH increased 1.5 percent, from 2,840 SCH in FY22 to 2,882 SCH in FY23(Table 1.20c).

UA System	1.949.9	1.418.2	1.144.2	1.128.9	939.7	-51.8	-16.8

Note: For non-credit course productivity unit (NCU). For

ne non-credit instructional hours, 150 NCUs would be

generated. If a non-credit course provides continuing education units (CEUs), one CEU is generally equivalent to one NCU. Many non-credit courses have associated course contact hours, however 68% of FY23 non-credit courses had no set contact hours. For this reason, some academic organizations displayed in Table 1.24c with non-credit student headcount do not have associated NCU in the table above.

Note: Audit credit hours and credit hours in courses that were not dual enrollment are excluded. Dual enrollment refers to enrollment at the university by a student who is simultaneously enrolled in a K-12 (or homeschool) for which the student may receive credit at both the K-12 and postsecondary levels. An individual high school student may be enrolled at more than one university. Only high school students who are dual enrolled are counted in the above figures, once at each university and once at the system. The technical methodology for identifying whether an individual is dual enrolled at a university was updated in September 2023; historical trends have been restated for FY19-FY23to provide a valid trend comparison. For additional details about each university's definition, see https://www.alaska.edu/ir/data/

Note: Reporting level headcount is unduplicated per fiscal year. A fiscal year consists of consecutive summer, fall, spring semesters, and yearlong courses. Campus headcount totals add up to more than university totals and university headcounts add up to more than the system total. This occurs because it is common for students to betremolled eat multiple campuses and/or fiscaltiple iversities in the same fiscal year. Therefore are.
